**LETTER OF THANKS AND COMMENDATION-TO BRECKLAND
BODYCENTRE: APRIL 2007**

I recently entrusted my Rolls Royce Silver Spur to Paul and his team at 'Breckland Body-centre' refinishing, for work over several areas of the limousine. This required removal of the inner door trim, electrics and door handles. The upper doors were refinished and blending in of the wheel arches plus a general tidying up of the front valance and removal of stone chips etc. This was not an easy task, mainly due to the electrical wiring within the doors and one which many may well have turned away.

I was delighted when I collected the Rolls Royce to see how much trouble Paul and his team had taken over this job. The refinished areas were a credit to this mark of vehicle, all expertly blended and in gleaming condition. Whilst this is nothing less than I have come to expect at 'Breckland Body-centre', I am in no doubt of the effort and expertise required to produce this quality of work.

As a qualified auditor to ISO 9001 and 'Fellow of the Institute of Metal Finishing', (awarded to me after 37 years in the refinishing trade), I feel well qualified therefore to recommend Breckland Body-centre for their standard in producing a first class product at competitive cost and one which I would describe as thoroughly professional.

Mr Ray Biddle. M.B.E F.I.M.F
